SUMMARY

Experienced frontend developer with a strong background in fintech and web application development. At **Vale Finance**, I contributed to building a **banking application** for seamless transactions and bill payments, as well as a **Back Office system** for internal operations. At **Femi Handbags**, I built a **CMS application** for content management, developed the company's **website**, and created an **ERP system** for managing sales and inventory.

In addition to my full-time roles, I have worked as a **freelance developer**, building fintech applications and other digital products. Passionate about creating user-friendly interfaces and scalable solutions, I bring expertise in **React, Next.js, Redux, and Tailwind CSS**, with a focus on performance, security, and seamless user experience.

EMPLOYMENT EXPERIENCE

Frontend Developer – Vale Finance - Hybrid

JANUARY 2024 - Present

My responsibilities include developing user-facing features using modern web technologies, ensuring UI/UX design feasibility, optimizing application performance, creating reusable components, integrating APIs, debugging cross-browser issues, and staying updated on emerging technologies.

- Developed a secure banking application for Vale Finance, enabling seamless money transfers, bill payments, and business account management. The app attracted over 10,000 new users within six months of launch, boosting customer engagement and expanding the business's reach.
- Built the **Back Office application** to support internal operations, including transaction monitoring and user data management.
- Ensured responsive design and smooth user experiences using modern frontend technologies.
- Worked closely with the product team to implement features aligned with financial regulations and user needs.

Frontend Developer– Freelance – Remote

2020– Present

- Developed user-facing features using modern frontend technologies like React, Next.js, and Tailwind CSS.
- Built reusable and scalable components to enhance development efficiency.
- Integrated APIs to enable seamless data exchange between frontend and backend systems.
- Ensured optimal performance, accessibility, and cross-browser compatibility.
- Collaborated with designers and stakeholders to implement responsive UI/UX designs.
- Debugged and resolved issues to maintain a smooth user experience.
- Stayed updated on emerging technologies to improve project outcomes.

Frontend Developer – Femi HandBags – Onsite

June 2023 – Jan 2024

I was responsible for building user interfaces, translating design concepts into functional code, optimizing application speed and responsiveness, creating reusable components, integrating APIs, resolving cross-browser issues, and keeping up with the latest web technologies and trends.

- Developed a **CMS application** to manage website content, ensuring seamless content updates and organization.
- Built the company's **official website**, focusing on responsive design and user-friendly navigation.

- Created an **ERP system** to track **sales and inventory**, streamlining internal business operations.
- Collaborated with design and backend teams to deliver cohesive digital solutions.

Frontend Developer – Fire Switch Tech- Onsite

Feb 2021 - September 2023

I developed user interfaces for Renimail by transforming design concepts into functional code, optimizing application performance and responsiveness, and building reusable components. I integrated third-party tools, ensured cross-browser compatibility, and stayed updated with the latest web technologies and trends. Additionally, I mentored over 20 individuals in frontend development, offering guidance on best practices and hands-on project execution.

- Built **Renimail**, an email marketing platform helping businesses grow their audience and increase visibility.
- Implemented features for **personalized email creation, campaign scheduling, and subscriber list management**.
- Integrated third-party tools and developed robust **analytics dashboards** for performance tracking.
- Focused on crafting intuitive, responsive UIs to enhance user experience.
- I also mentored over 20 individuals in front end development

PROJECTS/PRODUCTS EXPERIENCE

1. Vale Business Bank: [Web App](#) - [Website](#)

Vale Finance Limited is a Nigerian financial technology company dedicated to providing innovative banking solutions for individuals and businesses. Established in 2018 and fully operational since January 2022. The company offers a comprehensive suite of services, including high-yield savings accounts, flexible loan options, and seamless payment solutions, all accessible through user-friendly digital platforms.

2. Koyn App : [Web App](#)

Koyn is a Nigerian cryptocurrency platform. The platform enables users to sell various cryptocurrencies—including Bitcoin (BTC), Ethereum (ETH), Litecoin (LTC), and Ripple (XRP)—and receive instant Naira payments directly to their bank accounts or Koyn wallets. Beyond crypto transactions, Koyn offers utility bill payments, airtime purchases, and other financial services, all accessible through a user-friendly mobile & web application. The company emphasizes security by implementing advanced encryption and two-factor authentication, ensuring a safe environment for its users.

3. RENI MAIL : [Web App](#) - [Website](#)

Renimail is an all-in-one email marketing solution tailored for the African market. It enables businesses and organizations to craft engaging emails, manage subscriptions, and ensure prompt delivery of marketing campaigns. The platform offers easy integration with frameworks like React and Next.js, customizable forms, and API access for seamless communication
